1. Importación de Datos usando el Wizard

2.	Creación del primer paquete DTSX	7

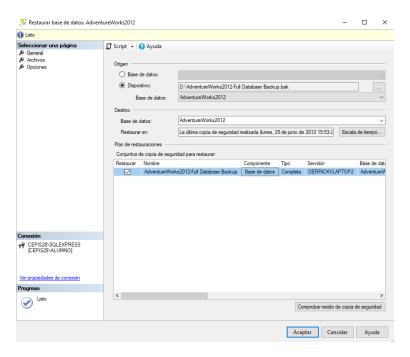

1

# 1. Importación de Datos usando el Wizard

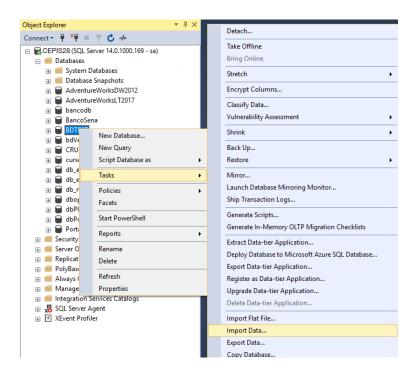

1. Primeramente crearemos una base de datos llamada BDTEST.

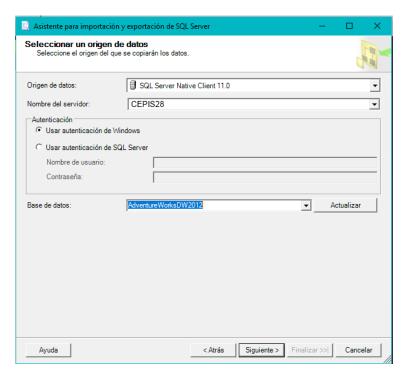

2. Ahora importaremos nuestra base de datos desde AdventureWorks.

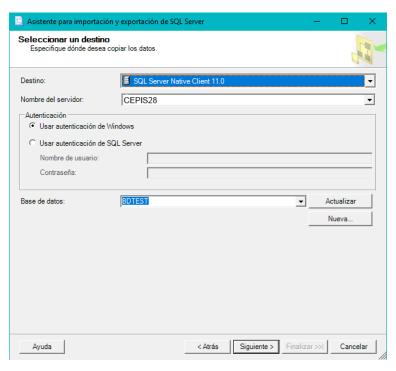

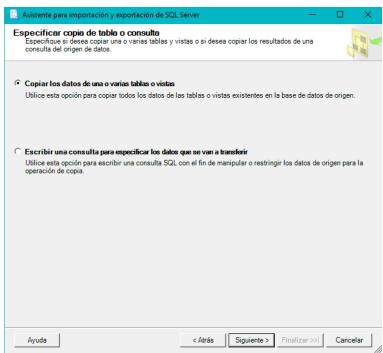

3. Next y escribir el Servidor y seleccionar la base de datosg.

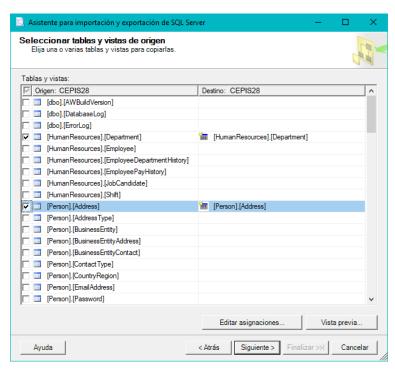

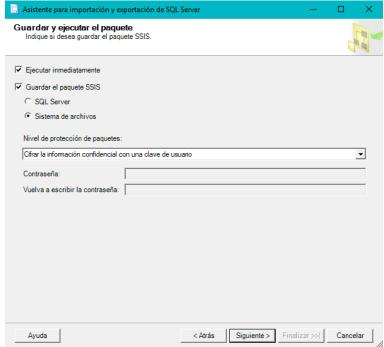

4. Data Source: La base de donde vamos a importar - Destination: La Base donde vamos a cargar la datas.

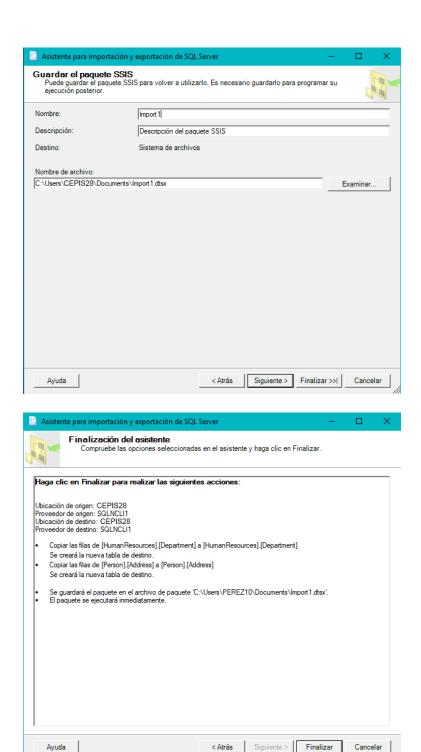

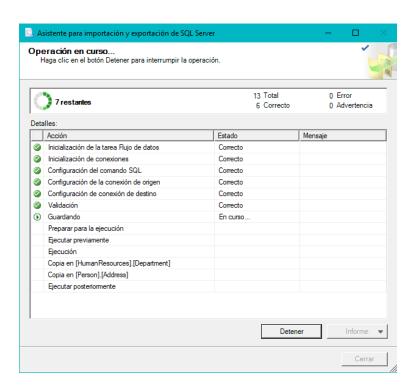

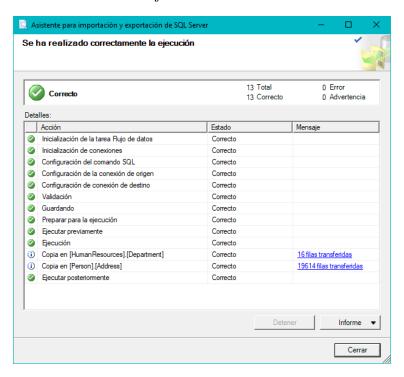

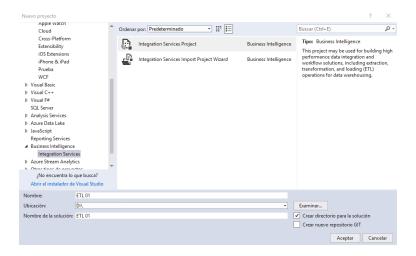

5. Al final veremos un resumen de la ejecución.

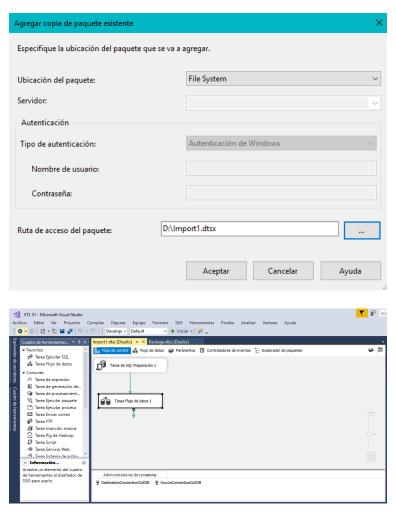

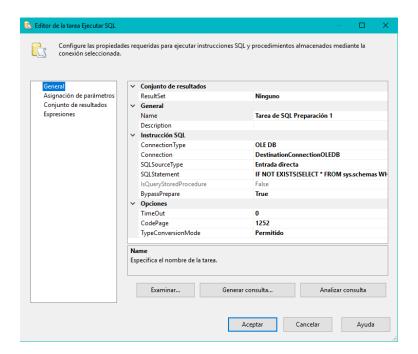

# 2. Creación del primer paquete DTSX

1. Abriremos un nuevo Proyecto en nuestro Visual Studio.

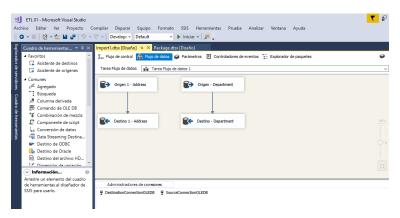

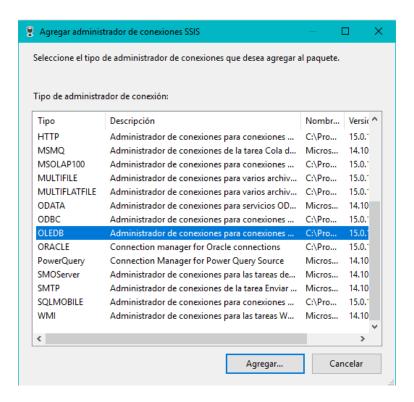

2. En al ventana nueva, sección Solución Explorer, Agrego el paquete generado antes.

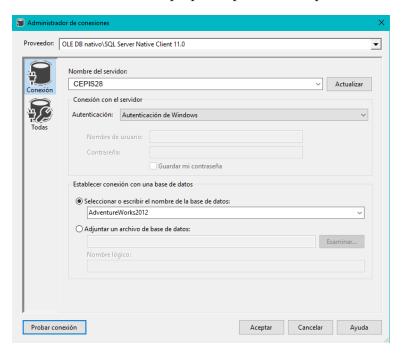

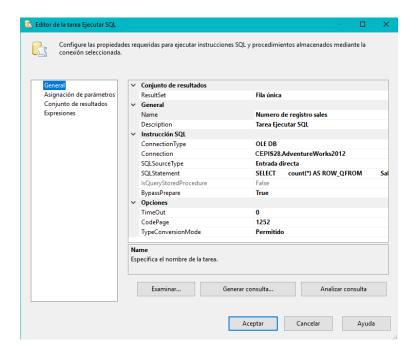

3. En la siguiente ventana mostramos el paquete que se ha importado.

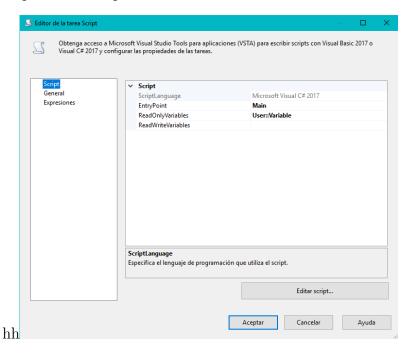

4. En la siguiente ventana mostramos el paquete que se ha importado.

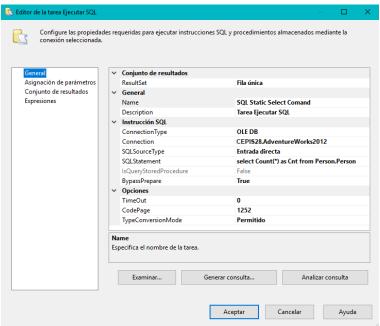

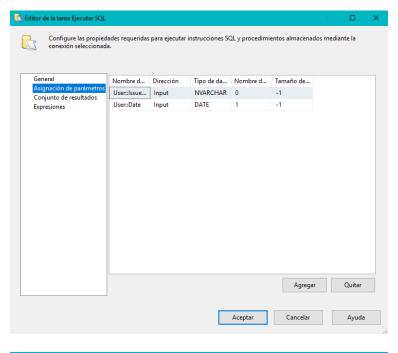

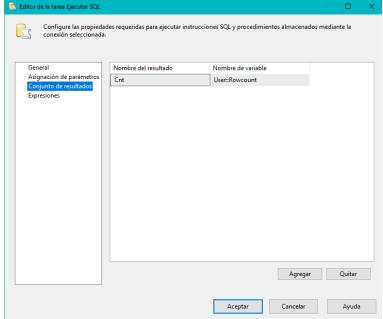

5. Editamos el componente Scrtipt Task Editor.

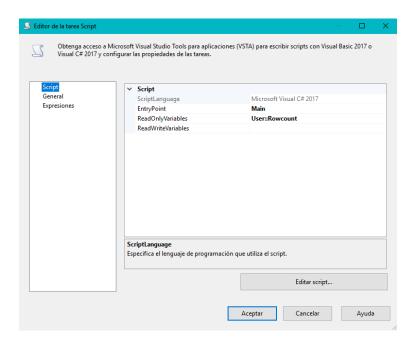

6. Guardamos y los ejecutamos.
